SKILLS

Programming & Scripting: Python, PySpark, Shell Scripting, Node.js

Databases & Data Warehousing: Oracle SQL, Hive, Snowflake

Big Data & Cloud Platforms: HDFS, AWS S3, AWS EC2, AWS SQS, AWS EKS, Cloud Data Lake

Data Engineering & Orchestration: ETL / ELT Pipelines, Apache Airflow, Data Ingestion, Data Migration, Pipeline Monitoring

Containers & DevOps: Docker, Kubernetes, OpenShift

Web Technologies: HTML, CSS, JavaScript, TypeScript, Angular

Core Concepts: OOPS, DBMS, APIs, Big Data Processing, Data Quality, Data Validation, Data Governance.

WORK EXPERIENCE

Citicorp CSC, India

US Personal Banking – Datalake Team

Aug 2025 – Present

- Worked on enterprise-scale Big Data platforms supporting banking data use cases.
- Built end-to-end ETL/ELT pipelines from HDFS → AWS S3 → Snowflake for downstream analytics and reporting.
- Automated production pipeline monitoring, data processing, and data quality validation to ensure reliability, accuracy, and regulatory compliance.

KYC Database Team

Jul 2024 - Jul 2025

- Served as Application Coordinator for a Node.js full-stack application, managing feature enhancements, maintenance, and end-to-end delivery.
- Developed and optimized Python-based ETL pipelines and executed Oracle → Hive data migration and transformations.
- Performed data quality checks, feed validation, and reconciliation across multiple enterprise systems

SG Interface KYC ETL Team - Internship

May 2023 - Jul 2023

- Developed ETL-based reporting solutions to support business insights.
 - Conducted feed validation and data quality checks to ensure accuracy, consistency, and compliance with reporting standards.
-

EDUCATION

Oct 2020 - May 2024

Bachelor of Technology in Information Technology

CGPA : 9.0

Madras Institute of Technology, Anna University , Chennai

- Strong foundation in OOPS, DBMS, Operating Systems, Cloud Computing, Big Data, and AI concepts.
 - Served as President of Finance, Entrepreneurship Club – organized technical and cultural events.
 - Winner of multiple coding competitions and hackathons.
 - Merit-based Scholar – TEMENOS, Banking Software Company.
-

KEY PROJECTS

- Enhancing Image Generation Using Autoencoders and Transformer-Based Generation, IEEE, Aug 2024. 🔗
- Department Inventory Tracker : Built a web-based system connecting to DB. Implemented automated Excel report generation along with bill/invoice uploads, tracking, and asset updates.
